

Gender Pay Gap Report

Gender pay gap reporting requires employers with more than 250 employees to publish statutory calculations every year showing how large the pay gap is between their male and female employees. The method for calculating this information is published on the UK government website gov.uk.

Lancashire Fire and Rescue Service (LFRS) are required to report on the following:

Mean gender pay gap	The difference between the mean hourly rate of pay of male employees and that of female employees as a percentage.
Median gender pay gap	The difference between the median hourly rate of pay of male employees and that of female employees as a percentage.
Mean bonus gap	The difference between the mean bonus pay paid to male employees and that paid to female employees as a percentage.
Median bonus gap	The difference between the median bonus pay paid to male employees and that paid to female employees who were paid a bonus during the relevant period.
Bonus proportions	The proportions of male and female relevant employees who were paid a bonus during the relevant period.
Quartile pay bands	The proportions of male and female employees in the lower, lower middle, upper middle and upper quartile pay bands.

Executive Summary

LFRS are committed to achieving a diverse workforce, irrespective of gender and we are confident that we are paying the same salary to roles of equivalent value to all staff. LFRS's overall approach to determining pay of its employees is to participate in national collective bargaining for all staff.

The UK average Gender Pay Gap using the National Statistics Data shows the average pay gap for all employees is 18.1%. Using this calculation methodology across LFRS, the **mean** gender pay gap is significantly different than the national average at -4.4% (equating to a £0.50 positive difference in hourly pay between males and females), with the **median** gender pay gap equating to 14.3% (equating to a £1.98 difference in hourly rates of pay between males and females). Contained within the overall number are, however, significant issues for consideration.

In particular the inclusion of Dual Contract and RDS employees appears to significantly skew the mean pay gap due to the method of calculation and the payment arrangements. The common factor between these two groups is a retained commitment if these two groups are excluded then the **revised mean** gender pay

gap becomes 19.9% (equating to a £3.29 negative difference) with a **median** gender pay gap of 23.2% (equating to a £3.59 negative difference).

LFRS Pay and Bonus Gender Pay Gap

This Gender Pay Gap Report is based on data as at 31 March 2017. LFRS employed 1115 staff with 950 (85.2%) being male and 165 (14.8%) being female.

However within this are 123 personnel who are not included in the calculation as they did not fulfil the required reporting criteria in that they were not in receipt of full pay (for example they were on extended sick leave or maternity leave).

Therefore the relevant numbers for reporting purposes are 992 staff, 846 male (85.3%) and 146 female (14.7%). A breakdown of employees by gender and staff group is shown below.

If RDS (271) and dual contract (81) are removed from the calculation the figures become 640, 514 (80.3%) and 126 female (19.7%). It is felt that doing this provides a more balanced picture as their pay arrangements differ significantly to the majority of employees. For completeness data in respect of mean and median for these RDS staff would still be included at table 2.1.

Staff Group	Females Employees	% Female Employees	Male Employees	% Male Employees
Wholetime (inc. Fire Control)	22	2.2%	447	45.1%
Corporate	104	10.5%	67	6.8%
RDS	17	1.7%	254	25.6%
Dual Contracted WT & RDS	3	0.3%	78	7.9%
Total	146	14.7%	846	85.3%

The data in this report has been broken down into four different staff groups that the Service employ who each have distinctive terms and conditions:

- a) **Wholetime Operational (including Fire Control):** These are full time firefighters and operational managers. Their terms and conditions are negotiated nationally, and salaries are determined in accordance with the role, with no reference to gender or any other personal characteristic. Firefighters are paid on an incremental competence based pay scale starting as a trainee, progressing to development after the initial training is complete and then competent once the development programme has been successfully completed and verified. Also included in this group are the Chief Fire Officer, Deputy Chief Fire Officer and Assistant Chief Fire Officer.
- b) **Corporate Staff:** These are largely non-uniformed support staff who are both full and part time. Again, their terms and conditions are negotiated nationally, and salaries are determined in accordance with the role, with no reference to

gender or any other personal characteristic. Also included in this group are the Director of Corporate Service and the Director of People and Development

- c) **Retained Operational:** These are RDS firefighters and operational managers whose primary employment is outside the organisation. Again, their terms and conditions are negotiated nationally, and salaries are determined in accordance with the role, with no reference to gender or any other personal characteristic. At the calculation date LFRS was unique in being the only English FRS to operate a RDS salary scheme. The Service now pays an enhanced rate of retaining fee but pay the standard turnouts, attendances and drills fees as prescribed by the national conditions of service.
- d) **Dual Contracted WT & RDS:** These are employed as **Whole-time Operational** staff in a full time capacity but they supplement this commitment by also providing an element of **RDS** cover

Table 2 Mean hourly pay rate by gender (detail excluding RDS and Dual contract)

	Mean Hourly Pay rate	Median Hourly Pay Rate
All Staff	£11.33 (15.87)	£13.84 (14.91)
Female	£11.75 (13.23)	£11.86 (same)
Male	£11.26 (16.52)	£13.84 (15.45)
Pay Gap	-4.4% (19.9%)	14.3% (23.2%)

Table 2.1 Mean Hourly rate by gender and occupational group

Hourly Rate	Female	Male	Gap	%
Wholetime	£15.45	£16.73	-£1.28	7.6%
Corporate	£12.76	£15.14	-£2.38	15.7%
RDS	£1.86	£1.72	£0.14	+8.0%
Dual Contract	£5.89	£7.63	£1.74	22.9%

LFRS does not offer a bonus scheme therefore this measure has not been calculated. Additional Responsibility Allowances (ARA's) and Continuous Development (CPD) payments are included in ordinary pay. For clarity, ordinary pay is defined as basic pay, shift premium pay, pay for piecework, pay for leave and allowances.

What do the mean and median gender pay gap figures tell us?

The mean gives an overall indication of the size of the gender pay gap in LFRS. A high mean gender pay gap indicates that a payment system is operated that may disadvantage women. The median gender pay gap gives an indication of what a 'typical' situation is. Measuring both the mean and the median percentages allows

LFRS to understand and consider the issue better including establishing what people are paid and also how the outliers affect the overall distribution of pay between males and females (the mean). It should be noted that the presence of a gender pay gap is not an indication that unlawful discrimination exists at LFRS. Within LFRS the difference is related to the structural distribution.

The mean gender pay gap indicates that when comparing the mean average hourly rates, female's earnings is 4.4% more (or 19.9% less) than male's earnings. The median gender pay gap at LFRS demonstrates that based on the median hourly rates, females at LFRS earn 85.7% (76.8%) of the males' earnings.

Quartile Distribution

The quartile distribution detailed below gives an indication of how males and females are distributed across the service.

Table 3 Quartile distribution by male and female

	Hourly Rate Range	Female	% Female	Male	% Male	Total
Lower	£0.93 - £2.49	15	6%	233	94%	248
Lower Middle	£2.49 - £13.84	95	38%	153	62%	248
Upper Middle	£13.84 - £16.54	14	6%	234	94%	248
Upper	£16.54 - £71.22	22	9%	226	91%	248

Commentary:

The formula used to calculate the gender gap divides the remuneration received by individuals by the hours of duty, when this is applied to an individual working a retained duty system the hours of cover provided on call significantly reduces the hourly rate of pay received. In addition at the calculation date, RDS staff in LFRS received a salary payment predicated on their hours of cover which emphasised that as a salary was paid the calculation reduced earnings per hour and corresponds with the government calculation. The result is the overall figure is distorted. In gender pay gap terms this would not be an issue if the gender balance was similar but the RDS numbers are 17 females v 254 males. This in effect means that the 254 RDS and the 78 male dual contract individuals, as opposed to 20 RDS and dual contract females, reduces the male hourly rate appreciably in the original calculation.

There is a high proportion of male employees employed on the National Joint Council (NJC) for Local Authority Fire and Rescue Service terms and conditions (known commonly as the 'Grey Book'), which attract additional allowances that are not available to staff conditioned to the NJC for Local Government Service ('Green Book') support staff, the majority of which are female. These additional allowances increases Grey Book average earnings and moves this staff group up to the lower middle quartile.

An example being that whilst basic salary across the support and uniformed staff is broadly comparable, uniformed staff receive recompense for their shift weekend working and unsocial hours in their basic pay regardless of requirement, whereas the same does not apply to individuals conditioned to a green book role. i.e. a firefighter is paid the same salary whether on a day shift or 2,2,4,

The majority of female part time staff are also found in the lower-middle quartile. This could be reflective of the family friendly nature of LFRS policies, whereby staff are afforded benefits such as flexible working and part time working to fit around family commitments. In addition, many of the roles are filled by younger employees who have just commenced their careers.

The proportion of females in the upper middle and upper quartile is reasonably reflective of the overall proportion of females within LFRS. The upper-middle quartile is predominantly male, but this is where the majority of staff undertaking the role of Firefighter can be found. A high proportion of males undertake the role of Firefighter so it is therefore unsurprising that this quartile is male dominated.

It is recognised that women are significantly underrepresented in the operational workforce and consequently LFRS is committed to increasing the number of female firefighters. This forms an important part of LFRS's approach to equality, diversity and inclusion within the Service. The recruitment freeze has limited opportunities to address this imbalance. LFRS is now undertaking positive action initiatives aimed at encouraging people from underrepresented groups to apply for positions in the organisation. Recruitment activity is locally monitored (including the levels of attraction and appointment) to identify problem areas to inform process improvements.

Should revised tables be used removing RDS and dual contract then this commentary would need to be amended.

Financial Implications

None identified.

Sustainability or Environmental Impact

Not applicable.

Equality and Diversity Implications

The Gender Pay Gap report provides information to inform and guide Equality, Diversity and Inclusion initiatives with the information being utilised to taking suitable steps to address any issues.

Human Resource Implications

The report informs both workforce planning and equality, diversity and inclusion initiatives and gain indication if 'talent' is not being effectively utilised.

Business Risk Implications

Failure to report against these regulations will lead to reputational damage to the Authority. The detail reported may lead to adverse comment and/or reputational damage. The Authority has a choice between reporting utilising the Governments methodology or reporting capturing the spirit of the requirement.
